CANDIDA ANTIBODY & ANTIGEN TESTING THROUGH FINGER STICK

Candida Antibody Comparison
Liquid Serum vs Dried Whole Blood Collection

US BioTek Laboratories is now offering through finger stick, **Candida Antibody Testing: Specific IgG, IgM, IgA and Candida Antigen**

This Candida Antibodies Profile offers the ease of specimen collection with the quality assurance in test results that you have come to trust with our ELISA analysis through liquid serum.

Our in-house parallel studies between both methods of sample collection have proven to be strict in comparison for each analyte through semi-quantitative ELISA; Specific IgG and IgM; to define a past or ongoing and present infection, respectively; and Specific IgA; to suggest infection localized at the mucosal beds.

- **Blood collection strip requirement: 3 strips**
- **Serum: 3 ml**
- **Test Run Time: 7 business days**
